

Global IP Connectivity Solutions

Network Professional Services

Managed Internet – ISP Solutions

Network Security Solutions

Nowadays, your organization likely crosses geographic boundaries without limits. Connecting those globally spread offices and personnel, including your global customers and suppliers - is a serious business!

Your network and the applications demand a reliable global connectivity that must perform efficiently and consistently. Selecting the right partner to deliver and support your global network is the key to lead the global competition. And that's where AVIANET comes in...

FACT SHEET | **Managed Global Networking Solutions**

AVIANET provides Managed Global Networking Solutions to airlines and global businesses worldwide. And those solutions are based on AVIANET's strong and careful selection of the best breed telekom partners and technologies - all in a carrier and vendor neutral environment. Our network solutions make it possible to connect your employees, partners, and customers in a highly reliable, secure and flexible way. It gives your people easy and stable access to vital applications and information, from anywhere and anytime, helping them become more productive, and ultimately helping your organization become more competitive.

Improved and Stable Network – Leads to Higher Business Performance

Whether you are looking to drive business productivity, growth, or address specific technology challenges,

Our Key Network Services and Capabilities Include:

- Network Health Assessment, Architecture & Design
- Network Analysis and Tuning
- IT Network Professional Services
- WAN Optimization Professional Services
- Wireless LAN Professional Services
- Carrier-Neutral WAN Connectivity Solutions
- Managed End User/ Campus LAN Solutions
- Globally Available Business Internet Solutions
- 24x7x365 Network Monitoring

anything is possible to achieve when your network infrastructure support your plans. Such approach will help your enterprise to achieve the improved application performance and availability, better protection of your network assets, and more globalized operations – which opens bigger and better opportunities for your people, customers and partners.

Still, network management, with evolving technologies and applications, can be challenging, and your internal staff may end up with the network management challenges instead of focusing on their core business initiatives.

Improved Network Performance Is in Your Reach

AVIANET Network Services experts can assess your network infrastructure, measure the performance of your network assets, design the business required network architecture, and implement your network strategy. We can help you address the areas of risk and plan for expansion and growth. In addition, we can assist you to achieve the required level of network performance, which can lead you to high availability, the ability to adopt and integrate new technologies, better performance, and improved business efficiency.

Stay competitive and save costs – all possible with our Managed Global Networking Solutions.

Our Managed Global Networking Solutions reach across every phase of the solutions lifecycle, and include:

- **Plan:** We provide a detailed analysis of your current network state and options, enabling improved decision-making and a foundation for change close to your business plans.
- **Design:** We leverage our technology expertise, neutral approach and extensive relationships with telecom vendors to help you utilize your current investments and control the cost of new technologies.
- **Implement:** Our teams having expertise and certifications across technologies can manage your network implementation with best possible results in each solution installation.
- **Operate and Manage:** From managed to do-it-yourself solutions, we can keep your network performing reliably for you and your business.

By allowing a trusted partner to manage your network assets, you can control CAPEX and staff levels, and keep your focus on your key business goals. Our expert teams and tools can help you efficiently evaluate and incorporate emerging technologies, and accommodate your most demanding business requirements – including managing third-party networks. You can decide about the engagement scope of AVIANET, from simple network monitoring up to complex network outsourcing services.

Let Experts Manage Your Network

Succeeding in this competitive business environment requires flexibility, agility, and focus. Airlines and other global enterprises cannot afford to get sidetracked by issues like regular training of their staff on new technologies, keeping track of out of support devices, and monitoring corporate networks.

Managing networks for leading airlines and global enterprises is our business. We have more than 15 years of experience delivering managed network services. We can help you understand the core elements driving your

global communication networks and implement a strategy to improve your reach, performance, capacity, and reliability.

Our managed WAN, LAN, and Internet-ISP management solutions, supported by industry-leading SLAs, can help you improve application performance, availability, secure your business assets, and keep your network and business future proof.

AVIANET Solutions Bring Added Values to Your Business

We strongly believe that our successful engagement can offer our customers access to the new levels of design, implementation, and management expertise, as well as leading solutions and services that can be delivered at the right cost.

While the benefits associated with such engagement and sourcing options can be significant, still IT management of airlines and other leading enterprises may remain cautious about losing control over their key IT resources. For example: What if those resources are not available to them when they are needed? Will responsiveness and service levels remain high? Will those resources, data, and applications remain secure?

By understanding and addressing those concerns, we have adapted a thorough and transparent approach, which can be practical and effective at the same time. AVIANET maintains established relationships with leading telecoms and technology vendors, enabling us to leverage from our collective buying power with multiple suppliers, which in turn allows us to pass those cost benefits to our customers.

Our **customizable solutions** enable innovative advancements to meet your organization's communications needs and improve business performance.
